SUMMARY

Software Engineer and Technical Designer seeking an entry-level position in the video game industry.

SKILLS

C#, C/C++, Java, Unity, Unreal Engine, GitHub, PlasticSCM, Miro, Jira

EXPERIENCE

Massachusetts Digital Games Institute (MassDiGI), Worcester, MA

May 2024 – August 2024

Lead Programmer

- Collaborated with five-person multi-disciplinary team in a professional environment to develop and publish the physics-based action game “Hamster Ball Blitz!” to iOS and Android within two months.
- Utilized Miro Kanban board and Agile methodology to track goals and assess progress.
- Programmed core gameplay systems in Unity and C#.
- Maintained file organization, consistent programming practices, and documentation for a team of two other programmers.
- Worked closely with artists to create art implementation pipelines for 2D animations that supported the game’s large cast of characters.
- *Provided game demonstrations at PAX East 2025 and 2026 and various MassDiGI open houses.*

Producer

September 2023 – December 2023

- Organized meetings for a multi-disciplinary team improving product features for a previously published mobile game.
- Utilized Miro Kanban board and Agile methodology to track goals and assess progress.

iD Tech Camps, Wesleyan University, Middletown, CT

July 2026 – August 2026

Lead Instructor

- Instructed campers between the ages of 7–15 in tech classes for engineering concepts and Minecraft Modding.

WPI PAX East 2024 IQP (Interactive Qualifying Project)

August 2023 – May 2024

- Organized booth for WPI’s Interactive Media and Game Development program.
- Planned and led events for the WPI IMGD and Boston Game Development communities.

International Game Developers Association (WPI Chapter)

January 2024 – December 2024

Vice President

- Established a new collaborative game jam to showcase the work of all club members in a single game.

PROJECTS

Sleeping with the Roaches (Unreal Engine 5)

March 2024 – April 2024

Available on itch.io, co-op 3D physics platform about two bugs bound by an elastic spider web.

- Programmed co-op characters capable of interacting with the game’s tether physics.
- Implemented animated user interface and created UI stack system to simplify the management of multiple layers of UI elements.
- *Presented Sleeping with the Roaches at PAX East 2025.*

Dragonfly Engine (C++, SFML)

January 2024 – February 2024

Programmed all aspects of a game engine with C++; created two console window games.

- Utilized Simple and Fast Multimedia Library for ASCII Graphics and Audio.
- Developed numerous features, including Event System, Display Manager, Input Manager, Log Manager, Game Objects, and UI.

Minigame Game Jam Framework (Unity)

Fall 2024 – Fall 2025

Programmed party minigame framework for the WPI IGDA chapter that allowed for a new type of collaborative Game Jam.

- Programmed multiplayer input system to interface various unconnected scenes and minigames.
- Created documentation for creating games using the framework.
- Compiled jam entries into a standalone party game.

EDUCATION

Worcester Polytechnic Institute (WPI), Worcester, MA

Graduated May 2025

B.A. in Interactive Media & Game Development, Concentration in Design

GPA: 3.55/4.0

Relevant Courses: Technical Game Development I & II, Computer Graphics, Algorithms, AI for Games, Computer Networks.
